## Software Developer

I am a seasoned software developer with 5 years of experience in the field, adept at tackling complex challenges and delivering high-quality solutions. My passion for continuous learning drives me to stay updated with the latest technologies and methodologies. I thrive in collaborative environments and have a proven track record of successfully working in remote teams. Fluent in English, Spanish, and Portuguese, I bring strong communication skills to every project, ensuring clear and effective interactions with team members and stakeholders. My dedication to excellence and adaptability make me a valuable asset in any dynamic development setting.

## Employment History

### ① React Developer

Panbox, Cochabamba

May 2020 – July 2020

In this job I mainly worked on frontend tasks on several applications developed using ReactJs, on this job I was able to work with modern ReactJs and also to refactor old snippets of code that worked with class components.

### ② Junior Full Stack Developer

Jalasoft, Cochabamba

August 2020 – July 2021

I worked as a software developer mainly working on a web application that we were working on called cosmic latte. The main web app was developed mainly in javascript and the data was stored in mongoDb. The web application also had a mobile app that we worked on using Flutter. This job helped me understand the basics of estimation and work group.

### ③ Data Analyst

Harris Govern, Cochabamba

August 2021 – March 2023

On this job my main tasks were to maintain and manage large sets of data on big client databases, also worked on data conversion and reporting services. Other than that there were tasks related to maintenance of the database servers. In addition I was able to create and refactor many stored procedures and views mainly using SQL Server.

### ④ Software Developer

Harris Govern, Cochabamba

April 2023 – June 2024

On this job I was able to work on many of the products that the business unit creates and sells. The products are mainly focused on govern applications for tax billing, mass appraisall, tax levies and many others. This products are mainly developed using WPF with C# and Visual Basic.

---

## Education

### ⑤ Bachelor of Systems Engineering

UPDS, Cochabamba

February 2017 – June 2023

I studied Systems Engineering, this helped me get the basics of programming, team work and software development in general. Also learned about hardware maintenance, and many other topics to set the foundations of my career.

### ⑥ Bootcamp

Fundacion Jala, Cochabamba

February 2019 – April 2020

In this bootcamp I was able to learn many important skills, such as Scrum, Git, Unit testing, Python. I had great trainers that always motivated us to never stop learning, even if we reached the goals, they always impulsed us to pursue for more knowledge or to improve what we already had.
